Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15, 2-9,11,12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee, et al.-2004/0098023 A1.

Lee discloses a vasoocclusive coil having a lumen with an expandable core therein. The expandable member can be a wire basket or balloon and it is attached to the outer occlusive member at locations along its length, for example by adhesive. The core when expanded provides the occlusive member with rigidity to substantially hold its shape. The core is also provided with a bioactive material as claimed. See paragraphs 16,35-39,44,46,52.

Response to Arguments

Applicant's arguments filed 05-23-2007 have been fully considered but they are not persuasive.

Applicant argues that the core member does not expand or contract to cause the coil to retain its shape. However, as noted above the cited paragraphs disclose that the core provides rigidity to the coil, discloses that the core is expandable once implanted into the body, and can be trained into a particular shape and cause the coil to take that

shape upon implantation. If the shape of the coil is to be linear, it will remain linear by virtue of the core expanding and offering resistance to possible external forces which would otherwise cause the coil to form into a curved shape.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
